U.T.S.G.Mutyala Raju
Web Developer

I am a Web Developer with a keen eye for design and a passion for crafting efficient and visually appealing websites. With a focus on the MERN stack. I am committed to staying at the forefront of emerging web technologies and design trends to deliver exceptional user experiences. I like to work in a team if you are looking for a person in your team, I am ready to occupy that!!!

Projects

Portfolio Site:

The portfolio site project is a web development endeavor focused on creating a professional website to showcase my work, skills, and accomplishments. It involves designing and building a visually appealing and user-friendly online platform to display various projects and information.

Drum Kit &Dice Rolling:

These projects are the mirror reflectors of my skills in front-end web development. In the Drum kit project, we can use it as a simple drum kit, whereas in dice rolling when two persons are rolling we can see who wins!!..

Expertise

- Proficient in front-end development using HTML5, CSS3, JavaScript, and modern frameworks like React.js.
- Skilled in back-end development with knowledge in Node.js, and Express.
- Experience in responsive web design, ensuring seamless user experiences across various devices and screen sizes.

Internship

IBM Frontend-Developer

Learned technologies on frontend development. As a front-end developer, I can easily create and implement the visual elements of a website or web application, ensuring an optimal user experience and interface. Learned technologies like HTML, CSS, Bootstrap, JavaScript, and React.js.

Tekorse Techonologies

I am currently engaged in an exciting internship as an IT intern, which has been a fantastic opportunity for me to gain hands-on experience in the field of information technology. This internship has allowed me to work closely with a team of skilled professionals, providing technical support, troubleshooting, and contributing to various IT projects.
